Que. Write a newspaper report about teacher student relationship in your college.

Ans. My college is a Graduation and Post-Graduation study center. We have strength of nearly 700 students. The college has highly educated and experienced teachers as the college is nearly 26 years old. In my college the teachers are very sincere about our classes and I feel that they enjoy teaching us. But as we students are of many varieties the teachers are also of many varieties. Some of them are very strict while others are lenient. Some are strict in the class and friendly outside the class. Some of them are always friendly while others are always strict.

In all I can say that the attitudes of the teachers may be different but all of them work for the benefit and welfare of the students. They are always conscious about the fact that most of us are from poor class having a very less academic culture in our home. Lots of extra-curricular activities are started by the teachers for our overall development. My teachers understand our financial stress or family problems and help us. They want us to be successful and lead a respectful life.
